

# ACTION INDONESIA

## GLOBAL SPECIES MANAGEMENT PLAN

### Achievements of Banteng, Anoa and Babirusa GSMPs

James Burton

Chair, IUCN SSC Asian Wild Cattle Specialist Group & Vice Chair, EAZA Cattle and Camelid TAG

and Corinne Bailey

Programme Officer, IUCN SSC Asian Wild Cattle Specialist Group

# Vision and Goals

- Vision: Safe and stable *in situ* and *ex situ* populations of banteng, anoa and babirusa
- Four main goals:
  1. To reach a demographically and genetically healthy global *ex situ* population
  2. To raise awareness among zoo visitors
  3. To use zoo expertise to help *in situ* conservation
  4. To prioritise and support *in situ* projects

# Key Activities

---

Increasing population and improving genetic diversity

Improving husbandry skills and animal living conditions

Raising awareness about lesser known threatened species

Assessing status of wild populations

# Five year progress: Increasing populations and improving genetic diversity in Indonesian zoo

---

- Two cycles of breeding and transfer recommendations
- Births following breeding recommendations:
  - 18 banteng
  - 8 anoa
  - 4 babirusa

# Raising awareness about lesser known threatened species

- **2 Action Indonesia Days** to raise global awareness about anoa, banteng and babirusa with **53 zoos** participating
- **67 practitioners** from Indonesian zoos and other conservation institutions have been trained in conservation education
- Toolkit of education resources developed to help raise awareness: <https://www.actionindonesiagsmp.org/educate>

# Improving husbandry skills and animal living conditions

**190 practitioners** from Indonesian zoos and other conservation institutions have been trained in husbandry and transportation

In 2020, we held **10 virtual husbandry training sessions** for Indonesian zoo staff. Experts from AZA presented on topics and provided advice to participants from over 33 institutions.

# Assessing the status of wild populations

---

- Project set up to monitor banteng populations through camera-trapping in Alas Purwo National Park, East Java
- And support to rescue of anoa and babirusa in Sulawesi

# How you can become involved

---

- Holding these species in your institution
- Contribute skills in husbandry or education
- Provide funding support for anoa and babirusa monitoring in Sulawesi or banteng monitoring in Alas Purwo National Park
- Join Action Indonesia Day! on 15th August 2021
