# Husbandry Resources

A principal goal of the AZA Ungulate TAGs is to support the best possible care and management for ungulates in human care. The following resources have been made available by the TAGs to help all institutions towards this goal.

## Husbandry Manuals

Husbandry Manuals provide a wealth of best-practice information based on the collective experience of AZA facilities.

## Behavioral Husbandry Committee

Training and enrichment are key components to caring for wildlife. To assist facilities with their behavioral husbandry questions, the Ungulate TAGs have created a Behavioral Husbandry Committee with experts in the field.

## Ungulate Profiles

Each profile includes brief husbandry information for all 81 TAG-recommended programs.

## Mixed Species Resources

An in-depth look at mixed-species exhibits with ungulates, including current, historic, and unsuccessful mixes.

## Working with non-AZA partners

Space is a primary constraint when it comes to sustainability of ungulate populations. Meaningful collaborations with non-AZA partners are one way to assist with population sustainability.

- Husbandry Manuals
- Behavioural Husbandry Committee
- Health/Disease resources?
- Contraception/Reproduction resources?
- Transportation guidelines?
- “Advanced husbandry skills”?

- Profiles
- Mixed species resources
- TAG priorities/focal species marketing?
- RCP-related info?

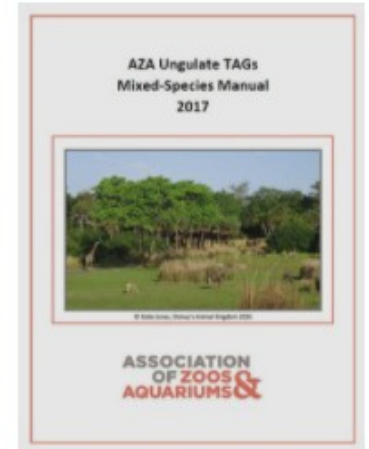

## Collection Planning

One of the key goals of AZA Ungulates is to promote the long-term commitment to ungulates in AZA institutions. The following resources have been developed to help facilities make informed decisions when it comes to adding and maintaining ungulates in their collections.

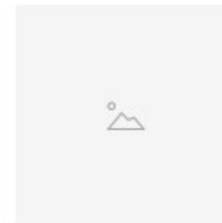

### Ungulate Profiles

One-page fact sheets of all 81 TAG-recommended programs, featuring information on husbandry, marketing, and conservation opportunities.

### Mixed Species Resources

Housing multiple species together is one way to increase space in modern zoos. See a comprehensive review of what has been attempted, including current, historic, and unsuccessful mixes.

TEST

# Conservation

- TAG-supported conservation programs
- SAFE initiatives
- Links to IUCN groups

# TAG Activities

- TAG introductions/summaries
- TAG meeting presentations
- Workshops and events
- Mentorship/professional development
- Non-AZA partner resources

# Other ideas

- A research section?
- Index TAG meeting presentations across topics, not just by year?
- Site search?
- \_\_\_\_\_ *<your idea here>*

# Where do we go from here?

- Figure out new site plan + what content is needed
- Collect and generate content (URG assistance?)
- Reduce time-sensitive content
- Market the website!

Want to get involved?
